Directions for completing "Property Floor Plan"

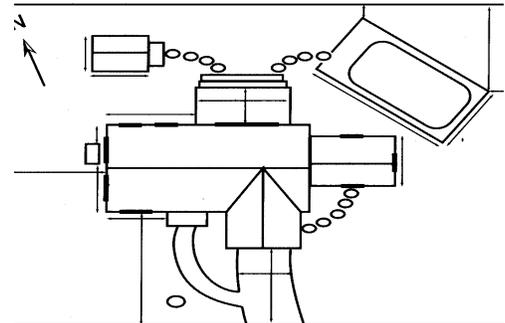

You will need:

Measuring Tape (100 ft is best) * Ruler * Pencil *Graph Paper

On Graph Paper:

Each Square represents 1'X1' 1/4"= 1 ft. Get your drawing as close to scale as possible.

Where ever possible, write your measurements inside the feature – leaving the landscape area free of writing.

- 1.Measure all property lines (use the survey as a reference if it is available)
2. Mark the house's placement on the property, showing all windows & doors – make a note of how high the widows are off the ground
- 3.Mark all permanent parts of the landscape that you do not plan to change (i.e. driveways, walkways, fences, patios, decks, trees, etc.)
- 4.Note the locations of all exterior electrical outlets and exterior faucets
- 5.Note the direction NORTH on your layout

Thank you for your part in making this an easy process! We will be happy to assist you in making your landscape project a success! Please bring this questionnaire, your photos, and your Property Floor Plan with you to your consultation appointment.
